United
Kingdom

zenzic.io

Zenzic was created by government and industry to accelerate the self-driving revolution in the UK. Zenzic is channelling £200 million of investment to unite industry, government and academia in the move to a safer, more inclusive and productive mobile future.

The UK Connected and Automated Roadmap to 2030

What is the roadmap?

The UK Connected and Automated Mobility Roadmap to 2030 is a tool for decision makers, investors and policy-makers for our mobile future.

What does the roadmap provide?

**Collaborative
view**

**Reduction of
risk**

Insights

**Shared
vision**

Who is the roadmap for?

The roadmap offers different views for different users

How was the roadmap created?

Collaboration is key

150+ organisations
contributed
to the roadmap

250+ individuals
contributed
to the roadmap

**Milestones
are connected
through almost**

600
unique relationships

Cross-ecosystem contribution means an unbiased view of the future

The roadmap aims to bring forward
connected and automated mobility*

from 2019

*CAM

The 2030 Vision was built upon government principles and priorities

ROADMAP VISION STATEMENT

FUTURE OF MOBILITY CORE PRINCIPLES

The future of mobility revolves around several fundamental principles. Ensuring safety, equality, accessibility and environmental conservation remain at the heart of CAM's future is paramount.

'By 2030, the UK is benefitting from proven connected and automated mobility, with an increasingly safe and secure road network, improved productivity and greater access to transport for all. Next-generation services and technology are designed and developed in the UK, powered by high value skills and a strong supply chain, and driven by public demand, we are a world leader.'

CCAV PRIORITIES

Safety and security
Productivity
Access to transport

Society and People

THEME

| STREAM | TRIALS, DEVELOPMENT AND ENABLING | | | | TRANSITION PHASE | | SCALE-UP AND REALISATION OF BENEFITS | | | | |
|---------------------------|--|------|---|------------------------------|---|------|--|----------------------------|---|------|------|
| | NOW | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 | 2027 | 2028 | 2029 | 2030 |
| Vehicle Approvals | Advanced trial approvals | | | | National approval scheme | | International approval harmonisation | | | | |
| Licencing and Use | Local codes of conduct for codes of services | | Alignment with the wider future of mobility | | National licencing scheme for CAM services | | Agile and adaptive development of CAM service regulation | | | | |
| Legislation and Insurance | Common risk and liability understanding | | Data sharing | | Changes in legislation | | Insurance policy refinements and lower premiums | | | | |
| Public Desirability | Increasing dialogue with the public | | | Increasing public experience | | | Desirable mobility | | Widespread acceptance and use of CAM | | |
| Investment | Establish investor forums | | Structural changes to scale-up funding | | Visible CAM benefits deliver on investor confidence | | Grow FDI and export markets for CAM | | CAM is a high value, low risk investment at scale | | |
| Skills | Establish skills centre of excellence and pipeline | | | | Improvement of skills pipeline | | | Sustaining skills pipeline | | | |
| Major Milestones | ▶ 2020 – Advanced trials approval process in place | | | | ▶ 2024 – Nationwide licencing approach for CAM services | | ▶ 2025 – National vehicle approval scheme in place | | | | |

Vehicles

| STREAM | NOW | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 | 2027 | 2028 | 2029 | 2030 |
|--------------------------|--|------|---|------|--|------|--------------------------------------|------|------|------|------|
| Automated Driving System | Common standards | | Low complexity design domain | | Medium complexity design domain | | High complexity design domain | | | | |
| Connectivity | Safety data standards | | Cooperative data sharing | | Legacy fleet connectivity | | Ubiquitous cooperative communication | | | | |
| Ergonomics and Design | Human interaction research | | Common HMI guidance | | Intuitive HMI and CAM vehicle design | | High utilisation vehicle design | | | | |
| Sensors | Low cost high precision sensor development | | Deliver initial sensor validation methodology | | Deliver full sensor validation methodology | | Enhanced sensor development | | | | |
| Major Milestones | ▶ 2021 – Data sharing agreements in place | | | | | | ▶ 2027 – Safety vehicle connectivity | | | | |

Infrastructure

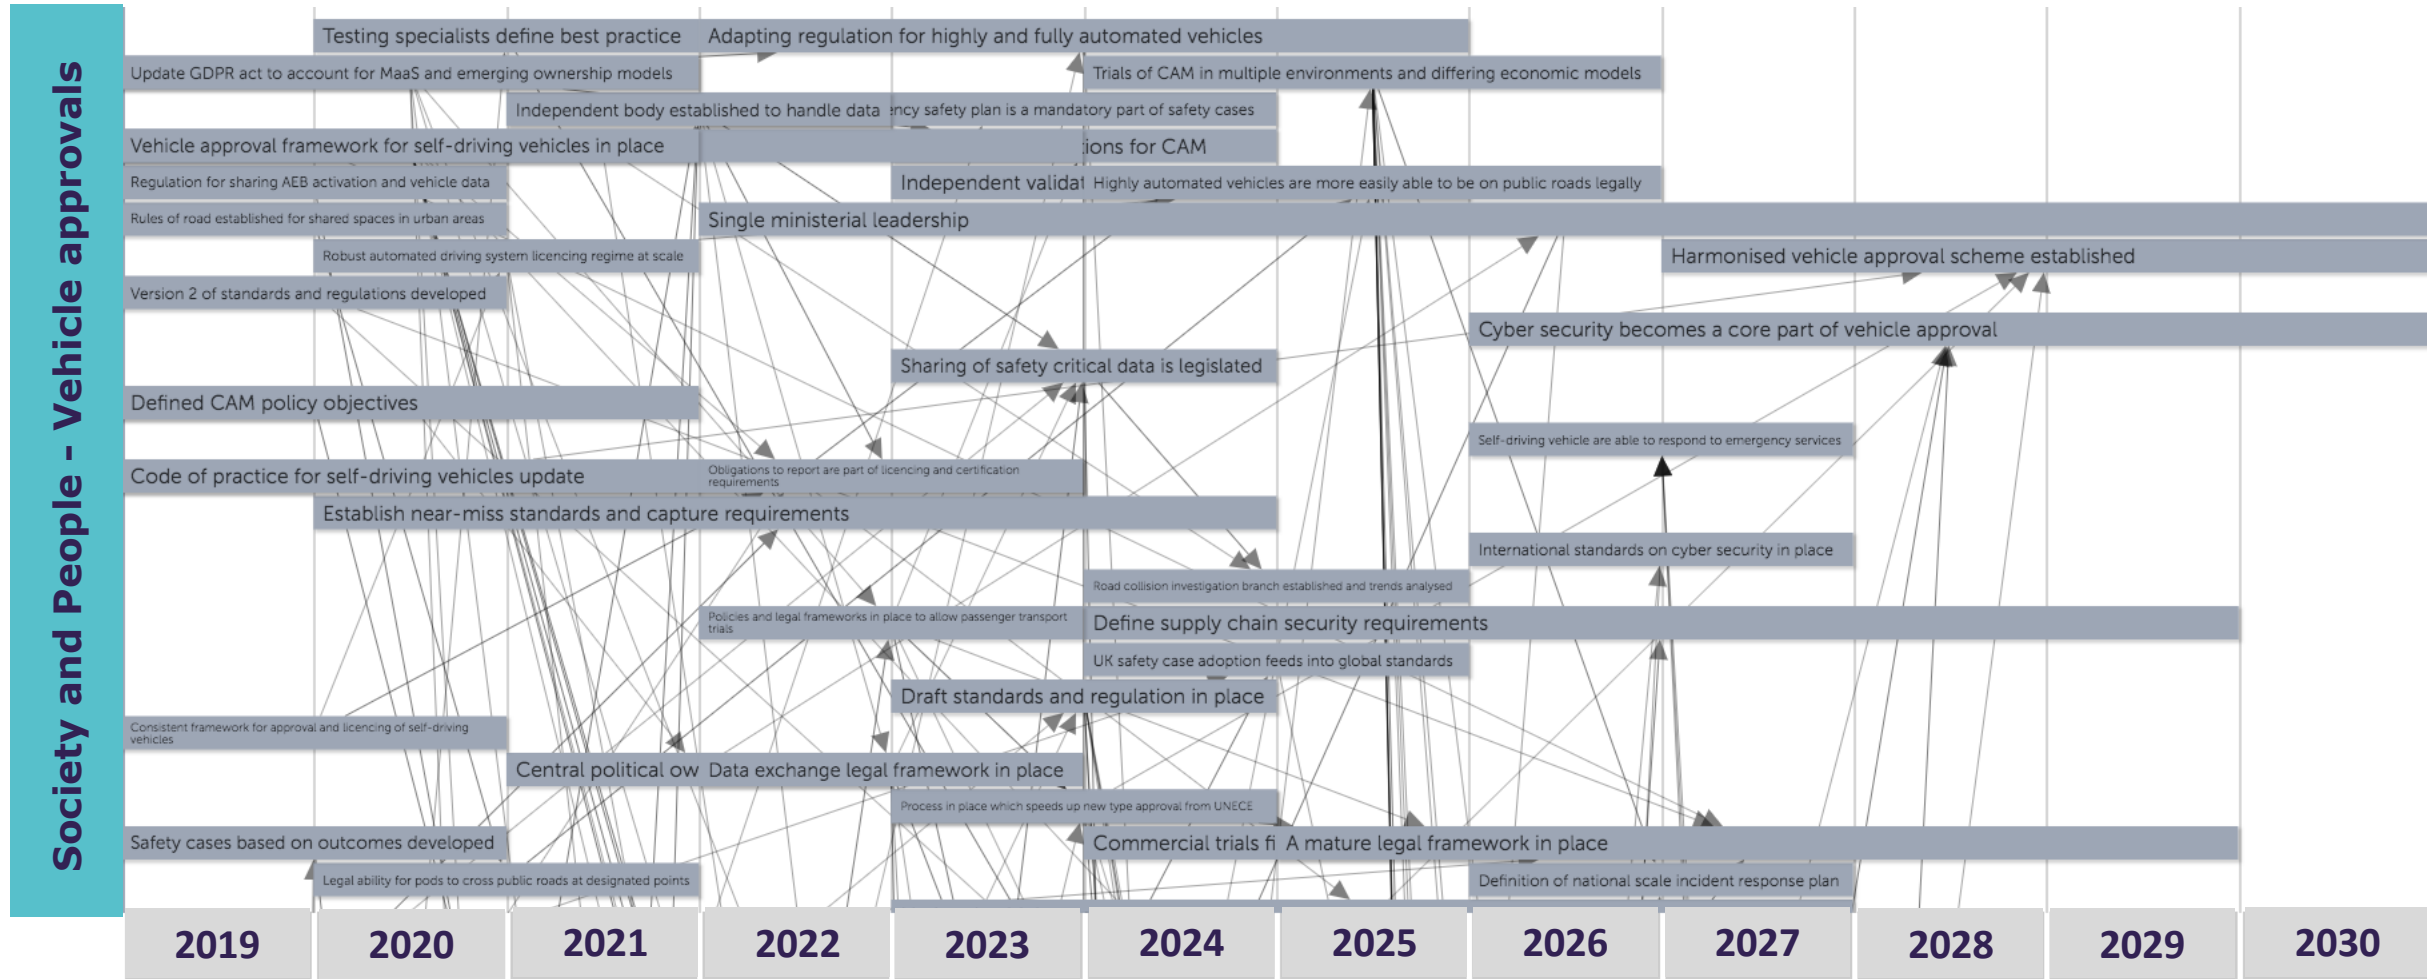

| STREAM | NOW | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 | 2027 | 2028 | 2029 | 2030 |
|--------------------------------|---|------|---|--|--|-------------------------------|--|---|--|------|------|
| Communications | Agree communications approach at a national level | | Plan coverage and rollout | | Deploy CAM road safety infrastructure | | | High connectivity across the road network | | | |
| Digital | Define data governance and ownership | | Develop virtual road environments for CAM | | Deploy virtual road environments for CAM | | National operational data hub | | Virtual road environments for operational management | | |
| Roads | New planning and investment guidance | | | Digitisation of signage assets | | Digitisation of road rules | | Repurpose infrastructure | | | |
| Intelligent Network Management | Understand new travel demands through trials | | | Define new operational models | | Deploy new operational models | | Increase network efficiency | | | |
| Test and Development | Cyber centre of excellence | | Deploy virtual test environments | | Develop automated validation | | Refresh Testbed UK | | | | |
| Major Milestones | ▶ 2020 – Testbed UK live | | | ▶ 2024 – UK-wide virtual environments for test and development | | | ▶ 2027 – Roadside signage no longer needed | | | | |

Services

| STREAM | NOW | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 | 2027 | 2028 | 2029 | 2030 |
|-----------------------|--|------|-----------------------------------|------|--|------|---|--|--|------|------|
| Personal Mobility | Demonstrator trials | | Small scale passenger deployments | | Deployments plugging mobility gaps | | CAM preferred in public service contracts | | Integrated services CAM more attractive than traditional services | | |
| Freight and Logistics | Low complexity trials | | New freight policy developments | | Small scale deployments | | Last mile CAM delivers productivity benefits | | | | |
| Inclusive Transport | Understand how CAM can improve access to transport | | Trials and pilots | | Commercially viable service deployment | | | Sustainable and inclusive CAM services | | | |
| Major Milestones | ▶ 2021 – First commercial pilot deployment of CAM | | | | | | ▶ 2028 – CAM services are preferable in contracts | | | | |

Simplifying the 600 relationships in the roadmap

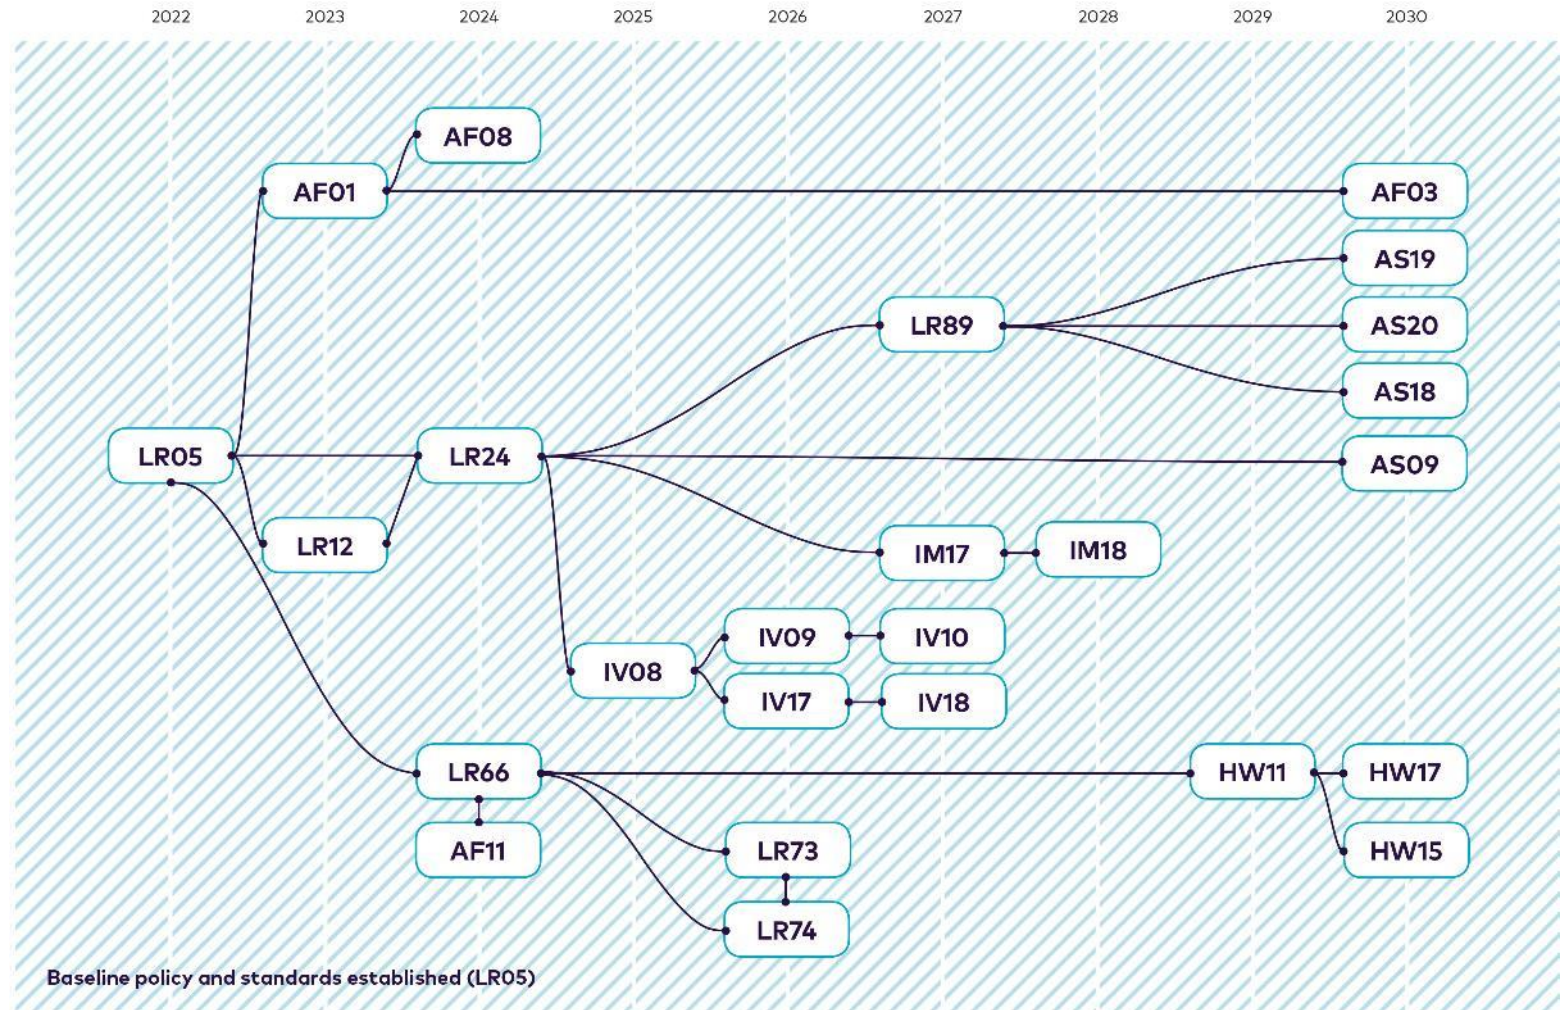

Key enablers

The start of Strands that unlock many other milestones

KEY

| ID | Milestone | Date |
|------|--|------|
| AF01 | Develop methods for testing AI and ML systems | 2023 |
| AF03 | Verification that AI and sensor fusion algorithms are able to self-determine exceedance of ODD | 2030 |

Golden Threads – finding your way through the roadmap

What is a Golden Thread?

**Bespoke
view**

**Meaningful
path**

**Interdependency
driven**
